Rush University Medical Center is an academic health system whose mission is to improve the health of the individuals and the diverse communities it serves through the integration of outstanding patient care, education, research and community partnerships. RUSH comprises Rush University Medical Center, Rush University, Rush Copley Medical Center and Rush Oak Park Hospital, as well as numerous outpatient care facilities. Rush University, with more than 2,500 students, is a health sciences university that comprises Rush Medical College, the College of Nursing, the College of Health Sciences and the Graduate College. Numerous national organizations have recognized Rush for the quality of care we provide, including U.S. News & World Report, which ranked Rush University Medical Center among the top 50 hospitals in five specialties in its 2019-2020 Best Hospitals issue. Rush University Medical Center has received Vizient’s Quality Leadership Award, ranking first among 99 academic medical centers across the country. In 2019, Rush was designated a leader in LGBTQ health care equality by the Human Rights Campaign for the 10th consecutive year, and was one of only five hospitals from across the nation to be recognized by the American Hospital Association as an honoree for its annual Equity of Care Award.}

Excellence Works Here.

Rush University Medical Center invites applications for The Robert E. and Emily H. King Endowed Professor of Cancer Research in the Department of Internal Medicine, Division of Hematology, Oncology and Cell Therapy. The ideal candidate is a physician scientist focused on immunotherapy in the treatment of lymphoma and hematologic cancers. The successful candidate will have a demonstrated history of extramural grant funding, an established reputation in the field and will be eligible to meet criteria as an incoming associate professor or professor. Eligible candidates will be expected to possess a MD, PhD or MD/PhD degree. The predominant criteria include: a major commitment to research and scholarly activity that advances the field of medicine, teaching, and institutional service appropriate to the programmatic need the individual is expected to fulfill.

The vision for The Robert E. and Emily H. King Cancer Immunotherapy Research Program is to develop the next generation of cellular and immunologic treatments for hematologic malignancies, focused initially on lymphoma, leukemia, or myeloma. To support this position, substantial annual financial support is committed for a 5-year period to fund the laboratory and translational science goals of the King Cancer Immunotherapy Research Program, above and beyond the candidate’s current grant funding. Furthermore, the successful candidate is anticipated to achieve substantial productivity during this time so as to be eligible to assume an endowed professorship that will support the Endowed Professor’s cancer research at Rush in perpetuity. The endowment financial support may be used for salary, laboratory staff and equipment.

Rush University System for Health (RUSH) is an academic health system whose mission is to improve the health of the individuals and the diverse communities it serves through the integration of outstanding patient care, education, research and community partnerships. RUSH comprises Rush University Medical Center, Rush University, Rush Copley Medical Center and Rush Oak Park Hospital, as well as numerous outpatient care facilities. A Staff Clinician position is available in the Immune Deficiency – Cellular Therapy Program (ID-CTP) of the Center for Cancer Research (CCR), National Cancer Institute (NCI), National Institutes of Health (NIH). Dr. Dennis Hickstein in the Immune Deficiency – Cellular Therapy Program is seeking a Staff Clinician to assume patient care responsibilities and participate in clinical research studies in transplantation for patients with GATA2 deficiency, a recently described bone marrow failure syndrome, as well as other primary immunodeficiency diseases.

The successful candidate must have an M.D. degree or equivalent, be a board eligible or board certified internist who has completed a hematology or oncology fellowship or have similar professional experience. He or she must demonstrate ability to provide high quality patient care for individuals undergoing hematopoietic stem cell transplant in clinical research trials.

The successful applicant will be appointed at a salary commensurate with his/her qualifications and experience. Full Federal benefits including leave, health and life insurance, long-term care insurance, retirement, and savings plan (or equivalent) will be provided.

Interested individuals should send a cover letter, curriculum vitae and bibliography, a brief statement of research interests and accomplishments, description of clinical experience, copies of up to five publications or preprints, and the names and addresses of three references to:

Dennis D. Hickstein, M.D.
Center for Cancer Research, National Cancer Institute
Email: hicksted@mail.nih.gov

Applications will be accepted until the position is filled.

HHS, NIH, and NCI are Equal Opportunity Employers.
The NIH and NCI are dedicated to building a diverse community in its training and employment programs and encourages the application and nomination of qualified women, minorities, and individuals with disabilities.
