

### COVER FIGURE

Megakaryocytes from a patient with GALE variants. The  $\beta 1$  integrin (green) and GPIIb $\alpha$  are preferentially distributed in the endoplasmic reticulum (red), since GALE dysfunction impairs their glycosylation and externalization to the membrane. See the article by Marín-Quílez et al on page 406.

### EDITORIAL

**323 | Introduction to a review series on single-cell genomics: getting ready for clinical impact in leukemia and myeloid neoplasms**

Katherine H. M. Sturgess, Nicola K. Wilson, and Berthold Göttgens

### BLOOD COMMENTARIES

**327 | Anemia and brain hypoxia**

John C. Wood

Comment on Hulbert et al, page 335

**328 | RROL lncRNA role in multiple myeloma**

Xabier Agirre

Comment on Morelli et al, page 391

**330 | GALE force in platelet production**

Attila Braun and Elmina Mammadova-Bach

Comment on Marín-Quílez et al, page 406

**332 | Transferrin receptor 1: keeper of HFE**

Nermi L. Parrow and Robert E. Fleming

Comment on Xiao et al, page 422

### PLENARY PAPER

**335 | Normalization of cerebral hemodynamics after hematopoietic stem cell transplant in children with sickle cell disease**

Monica L. Hulbert, Melanie E. Fields, Kristin P. Williams, Priyasha Bijlani, Shalini Shenoy, Slim Fellah, Alison S. Towerman, Michael M. Binkley, Robert C. McKinstry, Joshua S. Shimony, Yasheng Chen, Cihat Eldeniz, Dustin K. Ragan, Katie Vo, Hongyu An, Jin-Moo Lee, and Andria L. Ford

### REVIEW SERIES

**Single-Cell Genomics: Getting Ready for Clinical Impact in Leukemia and Myeloid Neoplasms**

**345 | Single-cell genomics in AML: extending the frontiers of AML research**

Asiri Ediriwickrema, Andrew J. Gentles, and Ravindra Majeti

**356 | Single-cell analysis of acute lymphoblastic and lineage-ambiguous leukemia: approaches and molecular insights**

Ilaria Iacobucci, Matthew T. Witkowski, and Charles G. Mullighan

**369 | The end of the beginning: application of single-cell sequencing to chronic lymphocytic leukemia**

Adi Nagler and Catherine J. Wu

**380 | Single-cell methods in myeloproliferative neoplasms: old questions, new technologies**

Jennifer Mary O'Sullivan, Adam J. Mead, and Bethan Psaila

*Continued on iv*

## LYMPHOID NEOPLASIA

---

### 391 | A MIR17HG-derived long noncoding RNA provides an essential chromatin scaffold for protein interaction and myeloma growth

Eugenio Morelli, Mariateresa Fulciniti, Mehmet K. Samur, Caroline F. Ribeiro, Leon Wert-Lamas, Jon E. Henninger, Annamaria Gullà, Anil Aktas-Samur, Katia Todoerti, Srikanth Talluri, Woojun D. Park, Cinzia Federico, Francesca Scionti, Nicola Amodio, Giada Bianchi, Megan Johnstone, Na Liu, Doriana Gramegna, Domenico Maisano, Nicola A. Russo, Charles Lin, Yu-Tzu Tai, Antonino Neri, Dharminder Chauhan, Teru Hideshima, Masood A. Shamma, Pierfrancesco Tassone, Sergei Gryaznov, Richard A. Young, Kenneth C. Anderson, Carl D. Novina, Massimo Loda, and Nikhil C. Munshi

## PLATELETS AND THROMBOPOIESIS

---

### 406 | Novel variants in *GALE* cause syndromic macrothrombocytopenia by disrupting glycosylation and thrombopoiesis

Ana Marín-Quílez, Christian Andrea Di Buduo, Lorena Díaz-Ajenjo, Vittorio Abbonante, Elena Vuelta, Paolo Maria Soprano, Cristina Miguel-García, Sandra Santos-Mínguez, Inmaculada Serramito-Gómez, Pedro Ruiz-Sala, María Jesús Peñarrubia, Emilia Pardal, Jesús María Hernández-Rivas, José Ramón González-Porras, Ignacio García-Tuñón, Rocío Benito, José Rivera, Alessandra Balduini, and José María Bastida

## RED CELLS, IRON, AND ERYTHROPOIESIS

---

### 422 | Regulation of iron homeostasis by hepatocyte Tfr1 requires HFE and contributes to hepcidin suppression in $\beta$ -thalassemia

Xia Xiao, Gillian A. Moschetta, Yang Xu, Allison L. Fisher, Víctor M. Alfaro-Magallanes, Som Dev, Chia-Yu Wang, and Jodie L. Babitt

## LETTER TO BLOOD

### 433 | Revisiting coexisting chromosomal abnormalities in *NPM1*-mutated AML in light of the revised ELN 2022 classification

Linus Angenendt, Christoph Röllig, Pau Montesinos, Farhad Ravandi, Gunnar Juliusson, Christian Récher, Raphaël Itzykson, Zdeněk Ráčil, Andrew H. Wei, and Christoph Schliemann

## BLOOD WORK

### 436 | Four genetic red cell disorders in one

Sihem Tarfi and Bouchra Badaoui

## ERRATA

### 437 | Lentzsch S, Gries M, Janz M, Bargou R, Dörken B, Mapara MY. Macrophage inflammatory protein 1-alpha (MIP-1 $\alpha$ ) triggers migration and signaling cascades mediating survival and proliferation in multiple myeloma (MM) cells. *Blood*. 2003;101(9):3568-3573.

### 437 | Campo E, Jaffe ES, Cook JR, et al. The International Consensus Classification of Mature Lymphoid Neoplasms: a report from the Clinical Advisory Committee. *Blood*. 2022;140(11):1229-1253.

### 438 | Barcellini W, Fattizzo B. How I treat warm autoimmune hemolytic anemia. *Blood*. 2021;137(10):1283-1294.
