

Journal of Clinical Pathology

Contents

Vol. 27, No. 11, November 1974

Immunological studies in a case of T-cell leukaemia

G. STATHOPOULOS, M. PAPAMICHAEL, P. SHELDON, D. CATOVSKY, A. J. S. DAVIES, E. J. HOLBOROW, AND EVE WILTSHAW

High counting rates from ^{125}I in radioimmunoassays

T. K. BELL

The role of circulating hepatitis B antigen/antibody immune complexes in the pathogenesis of vascular and hepatic manifestations in polyarteritis nodosa

CHRISTIAN G. TREPO, ARIE J. ZUCKERMAN, RICHARD C. BIRD, AND ALFRED M. PRINCE

Capillary blood collection in haematology

J. STUART, B. A. BARRETT, AND D. R. PRANGNELL

Folates in human serum

K. RATANASTHIEN, J. A. BLAIR, R. J. LEEMING, W. T. COOKE, AND V. MELIKIAN

A simple method for the clinical determination of the mitotic activity of the human prostate *in vitro*

K. E. O. SENIUS, J. PIETILÄ, I. ARVOLA, AND P. TUOHIMAA

Culture of specimens other than sputum for *Mycobacteria*

D. A. MITCHISON AND V. R. ABER

Unusual skin sepsis due to a strain of multiresistant *Staphylococcus aureus*

JOY HARRISON AND R. W. LACEY

Comparison of the titres of ASO, anti-DNase B, and antibodies against the group polysaccharide of group A streptococci in children with streptococcal infections

L. E. GOEDVOLK-DE GROOT, N. MICHELBENSINK, M. M. VAN ES-BOON, A. H. VAN VONNO, AND M. F. MICHEL

Sensitivity of *Streptococcus pyogenes* to sulphamethoxazole, trimethoprim, and cotrimoxazole

E. YOUNG, M. P. VANDERLINDEN, AND E. SCHOUTENS

The rapid recognition of Lancefield group B haemolytic streptococci

R. J. FALLON

Bactericidal capacity of peripheral blood leucocytes in relation to bacterial infections in acute lymphoblastic leukaemia in childhood

EILEEN N. THOMPSON AND RALPH WILLIAMS

Indirect immunofluorescence test for the detection of *Aspergillus fumigatus* antibodies

D. W. WARNOCK

Separation of three isoenzymes of N-acetyl- β -D-hexosaminidase from human tissues by cellulose acetate membrane electrophoresis

A. WESTWOOD AND D. N. RAINE

Plasma alkaline phosphatase isoenzymes in hepatobiliary disease

A. O. AFONJA AND D. N. BARON

Sterilization of the biological safety cabinet

S. W. B. NEWSOM AND B. M. WALSHINGHAM

Technical method

A simple and rapid method for the differentiation of the members of the genus *Klebsiella*

R. FREEMAN

Book review

The Association of Clinical Pathologists: 93rd general meeting

Annual Subscription 12 issues \$46.50

All subscriptions to the United States can be ordered from the BRITISH MEDICAL JOURNAL, 1172 Commonwealth Avenue, Boston, Mass. 02134. Subscriptions for all other countries should be ordered from the Subscription Manager, JOURNAL OF CLINICAL PATHOLOGY, B.M.A. House, Tavistock Square, London, WC1H 9JR, England, or through any leading subscription agent or bookseller.

Factor Deficient Human Plasma

- Substrate Quality
- Stable
- Fresh Frozen
- Mono-Specific

(Partial) Price List (F.O.B. Salem, N.H.)

Coagulation Deficiency	In 5 ml Vials	In Bags
Factor V, VII, XI, XII or XIII	10 ml — \$ 40.00	250 ml — \$ 475.00
	25 ml — 75.00	500 ml — 850.00
	50 ml — 135.00	1000 ml — 1500.00
	100 ml — 250.00	
Factor VIII or IX	10 ml — 25.00	250 ml — 225.00
	25 ml — 45.00	500 ml — 400.00
	50 ml — 75.00	1000 ml — 750.00
	100 ml — 125.00	

- All shipments are packed with dry ice in styrofoam boxes. (Handling Charge \$10.00 for orders under \$150.00). Shipments within the United States are delivered within 24 hours.
- Plasma can be aliquoted to smaller amounts (1, 2, 3, 4 ml) at an additional charge of \$.50 per vial.
- Special discount prices upon request for standing orders or large volumes.

Also available —

**Factor X • Factors VIII or IX with inhibitor • Von Willebrand • Fletcher Factor
Hepatitis-associated Antibody Plasma (high potency) • Many others**

INTRODUCING A DRAMATIC NEW WAY TO LOOK AT DIFFERENTIAL COUNTING.

IT CAN SAVE YOU A LOT OF TIME AND MONEY.

Now there's an easier way to do a differential count. The Honeywell ACS 1000. It's an Automated Computerized Scanning system that should cut your differential counting time in half or better. It also reduces fatigue and increases your accuracy.

The ACS 1000 finds and focuses on white cells as fast as you can identify them. Identification is easy because the cells are presented 3000x actual size on a color TV screen. Complete differentials including RBC and platelet evaluations can be entered via the keyboard. Results are printed automatically and a unique review mode is provided.

But one of the most surprising features is the price. Amazingly low. In fact, less than one-third the cost of those other semi-automated counters you have been hearing about. You'll be able to save money even if your volume is as low as 50 differentials a day.

Any way you look at it, Honeywell's ACS 1000 is a practical addition to any lab. For more information, call or write Product Manager, Medical Systems Center, Honeywell Inc., 600 N. 2nd Street, Hopkins, Minn. 55343.
