

BLOOD*The Journal of Hematology***CONTENTS**

- IgG Half-Molecules: Clinical and Immunologic Features in a Patient
With Plasma Cell Leukemia....*Hans L. Spiegelberg, Victor C. Heath,*
and J. Eugene Lang 305
- Syndrome of Recurrent Increased Secretion of Antidiuretic Hormone
Following Multiple Doses of Vincristine.....*Marie J. Stuart,*
Charles Cuaso, Myron Miller, and Frank A. Oski 315
- Human Chronic Myelogenous Leukemia Cell-Line With Positive
Philadelphia Chromosome.....*Carmen B. Lozzio*
and Bismarck B. Lozzio 321
- Neutrophil Alkaline Phosphatase: Comparison of Enzymes From Normal
Subjects and Patients With Polycythemia Vera and Chronic Myeloge-
nous Leukemia*Daniel Rosenblum and Shirley J. Petzold* 335
- Use of Postpheresis Plasma to Improve Granulocyte Yields for
Transfusion.....*Albert J. Roy, Alberts Brivkalns,*
and Ronald A. Yankee 345
- Selection of Patients for Bone Marrow Transplantation in Severe Aplastic
Anemia...*Bruce M. Camitta, Joel M. Rapoport, Robertson Parkman,*
and David G. Nathan 355
- “Early-Peak” Carbon Monoxide Production in Certain Erythropoietic
Disorders.....*McDonald K. Horne, III, Wendell F. Rosse,*
Edward G. Flickinger, and Herbert A. Saltzman 365
- Observations on the Mechanical Precipitation of Oxy Hb S and Other
Mutants*Eugene F. Roth, Jr., Danek Elbaum, and Ronald L. Nagel* 377
- Hemoglobin J^{CHICAGO} ($\beta 76(E20) \text{Ala} \rightarrow \text{Asp}$): A New Hemoglobin Variant
Resulting From Substitution of an External Residue ...*Paul L. Romain,*
Allen D. Schwartz, Mir Shamsuddin, Junius G. Adams, III,
R. George Mason, Loyda N. Vida, and George R. Honig 387
- Heparin-induced Thrombocytopenia: Confirmation of Diagnosis With
In Vitro Methods*Joseph C. Fratantoni, Robert Pollet,*
and Harvey R. Gralnick 395
- Abnormalities of Factor VIII and Platelet Aggregation— Use of
Ristocetin in Diagnosing the von Willebrand Syndrome
Harvey J. Weiss 403

(Contents continued)

Short Communication: Possible Association of Newly Absorbed Serotonin With Nonmetabolic, Granule-located Adenine Nucleotides in Human Blood Platelets.....	<i>Holm Holmsen, Carol A. Setkowsky, and H. James Day</i>	413
Culture of Autologous Bone Marrow in Diffusion Chambers: Effect of Host Irradiation.....	<i>J. A. Laissue, A. D. Chanana, E. P. Cronkite, D. D. Joel, and M. Pavelec</i>	417
Erythropoiesis in Steel Mutant Mice: Effects of Erythropoietin In Vitro	<i>David H. K. Chui and Brian V. Loyer</i>	427
Morphologic and Functional Characteristics of Bone Marrow Macrophages From Imferon-treated Mice.....	<i>Martha E. Fedorko</i>	435

DON'T READ THIS AD

(If you're not interested in RBC or WBC

osmotic fragility

or Platelet Aggregation)

In just 3½ minutes, the Fragiligraph records and measures the fragility of erythrocytes. In just 7 minutes, the Fragiligraph records and measures the fragility of leukocytes. Additionally, an adaptor is being made available which determines platelet aggregation—eliminating the need for a separate costly instrument for this procedure alone.

All completely automatic, all measured in minutes, all read at a glance. And all in one instrument, the Fragiligraph.

In present use at an impressive array of clinical and research centers, the Fragiligraph is now recognized as a valued adjunct in such broad spectrum areas as: *Blood Preservation and Survival, Pediatrics, Oncology; Radiation, Pressurization, Kidney Dialysis; Mechanical Trauma and Toxicological Studies*, among others.

For elaborated details on the above, write to us and receive all 35 of the published current literature.

Unless you're not interested in rapid automated tests for RBC or WBC osmotic fragility. Or platelet aggregation. And haven't read this ad.
