COPYRIGHT

This journal and the individual contributions contained in it are protected under copyright. Except as set forth herein or in an applicable user license, no part of this publication may be reproduced, stored in a retrieval system, translated, or transmitted in any form or by any means now or hereafter known, whether electronic, mechanical, photocopying, recording, or otherwise, without prior written permission from the Publisher.

Important notice: Authors retain certain nonexclusive rights. For further information on rights and permissions, see <https://ashpublications.org/bloodadvances/pages/copyright>.

In addition to the terms of any Creative Commons or other user license that has been applied by the Publisher to an individual article, the following terms and conditions apply to the use of this journal and the individual contributions contained in it.

Photocopying: Single photocopies of single articles may be made for personal use as allowed by national copyright laws. Permission is not required for photocopying of articles for noncommercial purposes in accordance with the user license applied by the Publisher. Permission of the Publisher and payment of a fee are required for all other photocopying, including multiple or systematic copying and copying for advertising or promotional purposes, resale, and all forms of document delivery. Special rates are available for educational institutions that wish to make photocopies for nonprofit educational classroom use. Permission requests may be completed online via the link on each article page; further information is available at www.elsevier.com/permissions.

Derivative works: Users may reproduce tables of contents or prepare lists of articles, including abstracts, for internal circulation within their institutions or companies. Permission of the Publisher is required for resale or distribution outside the subscribing institution or company. For articles published under a CC BY-NC-ND license, permission of the Publisher is required for all other derivative works, including compilations and translations.

DISCLAIMER NOTICE

The ideas and opinions expressed in *Blood Advances* do not necessarily reflect those of The American Society of Hematology, the Publisher, or the Editors of *Blood Advances*. Practitioners, researchers, and other readers must always rely on their own experience and knowledge in evaluating and using any information methods, compounds, or experiments described herein. The American Society of Hematology does not assume any responsibility for any injury and/or damage to persons or property arising from or related to any use of the material contained in this periodical. It is the responsibility of the treating physician or other health care professional, relying on his or her independent experience and knowledge of the patient, to determine drug dosages and the best treatment for the patient.

Although all advertising material is expected to conform to ethical (medical) standards, inclusion of an advertisement or other product mention in *Blood Advances* should not be construed as an endorsement of the quality or value of the product or of any claims made by the manufacturer about it. Readers are encouraged to contact the manufacturer with any questions about the features or limitations of the products mentioned. Readers are advised to check the appropriate medical literature and the product information currently provided by the manufacturer of each drug to be administered to verify the dosage, the method and duration of administration, or contraindications. Because of rapid advances in the medical sciences, in particular, independent verification of diagnoses and drug dosages should be made. To the fullest extent of the law, no responsibility is assumed by the American Society of Hematology or the Publisher for any injury and/or damage to persons or property as a matter of product liability, negligence, or otherwise, or from any use or operation of any methods, products, instructions, or ideas contained in the material herein.
