Figure S1. Expression levels of CD70 in primary tumor cells from PDX mice. The frequency of CD70 expression in primary tumor cell (hCD45⁺CD3⁺ T cell) from PBS or SGN-CD70A treated PDX mice and the corresponding survivals.
Figure S2. CD70 and CD27 expression in primary tumor cells form PDXs. The populations of the CD70 and CD27-expressing cell (in CD3⁺CD4⁺ T cell) from spleen of three PDXs.
